About us

The Kansas Algebra Program (KAP) is the part of the Department of Mathematics at the University of Kansas that serves students in Math 002 (Intermediate Algebra) and Math 101 (College Algebra). Employing undergraduates allows the program to aid student success through key support features such as small class sizes and free drop-in tutoring which is available over 55 hours each week.

KAP provides a cooperative learning environment where students interact with peers in and out of the classroom. The peer relationship provides a connection that positively impacts the learning process for both students and discussion leaders.

Employee Opportunities

**Tutors** (everyone)
- Understand and be proficient in Math 002 and 101 curriculum
- Tutor one-on-one in the Help Room
- Proctor and grade exams

**Discussion Leaders** (some)
In addition to the responsibilities of a tutor:
- Lead a class of 22-25 students
- Prepare 2-3 lessons a week
- Participate in weekly training

Employee Benefits

Working with KAP provides an opportunity for:
- A paid student-hourly position in the Department of Mathematics
- A flexible, on-campus working environment
- Strengthening fundamental algebra concepts
- Interacting with a diverse group of students and co-workers
- Growth in leadership qualities, verbal communication, and organizational skills
